

NTWphone

Follow Me

NTFW®

ADVANTAGES

- Internal call forwarding to another device
- May be executed and ended from the “foreign” extension

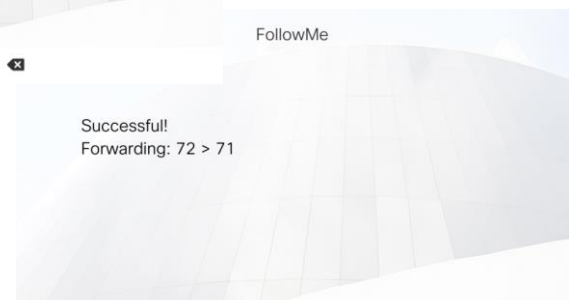

Remote call forwarding

The Follow Me service provides the user with the option to forward their extension to any other internal device, even if they are not near their phone.

The Follow Me service can be executed directly on the “foreign” phone. After identification via extension and password the calls may be forwarded to the other extension.

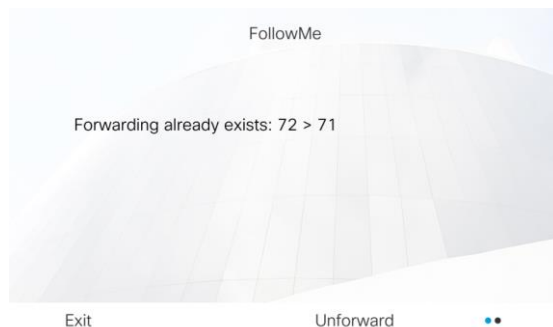

Password query for activation and de-activation Follow Me functionality

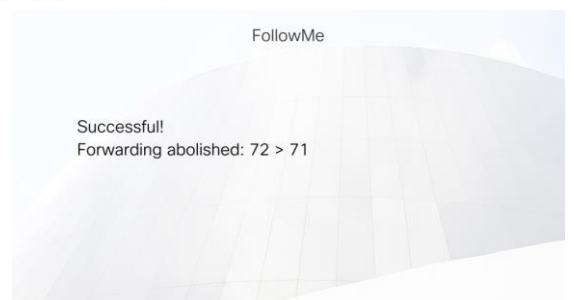

Forwarding successfully activated

The forwarding may be terminated directly on the phone – after entering extension and password. Alternatively, it can be lifted on the user’s home device.

Forwarding already exists

Forwarding successfully abolished
